End-of-Lease & Disposal Module Help

Lease exit, return, assessment, disposition, settlement and closure flow

WHAT THIS GUIDE COVERS

Use this guide to manage a contract end date through notices, option selection, asset return and assessment, then into disposition, sale, write-off, settlement and final lifecycle closure.

MODULE FLOW AT A GLANCE

Identify → Decide → Return → Assess → Dispose → Settle → Close

HOW TO READ THIS GUIDE

Data flow image	Shows the controlled sequence and the records that move the work forward.
Entity map	Names the primary records and the role each record plays in the module.
Record guide	Explains the data each stage needs and the decision it makes possible.
Practical guidance	Highlights operational controls and the most important handoffs.

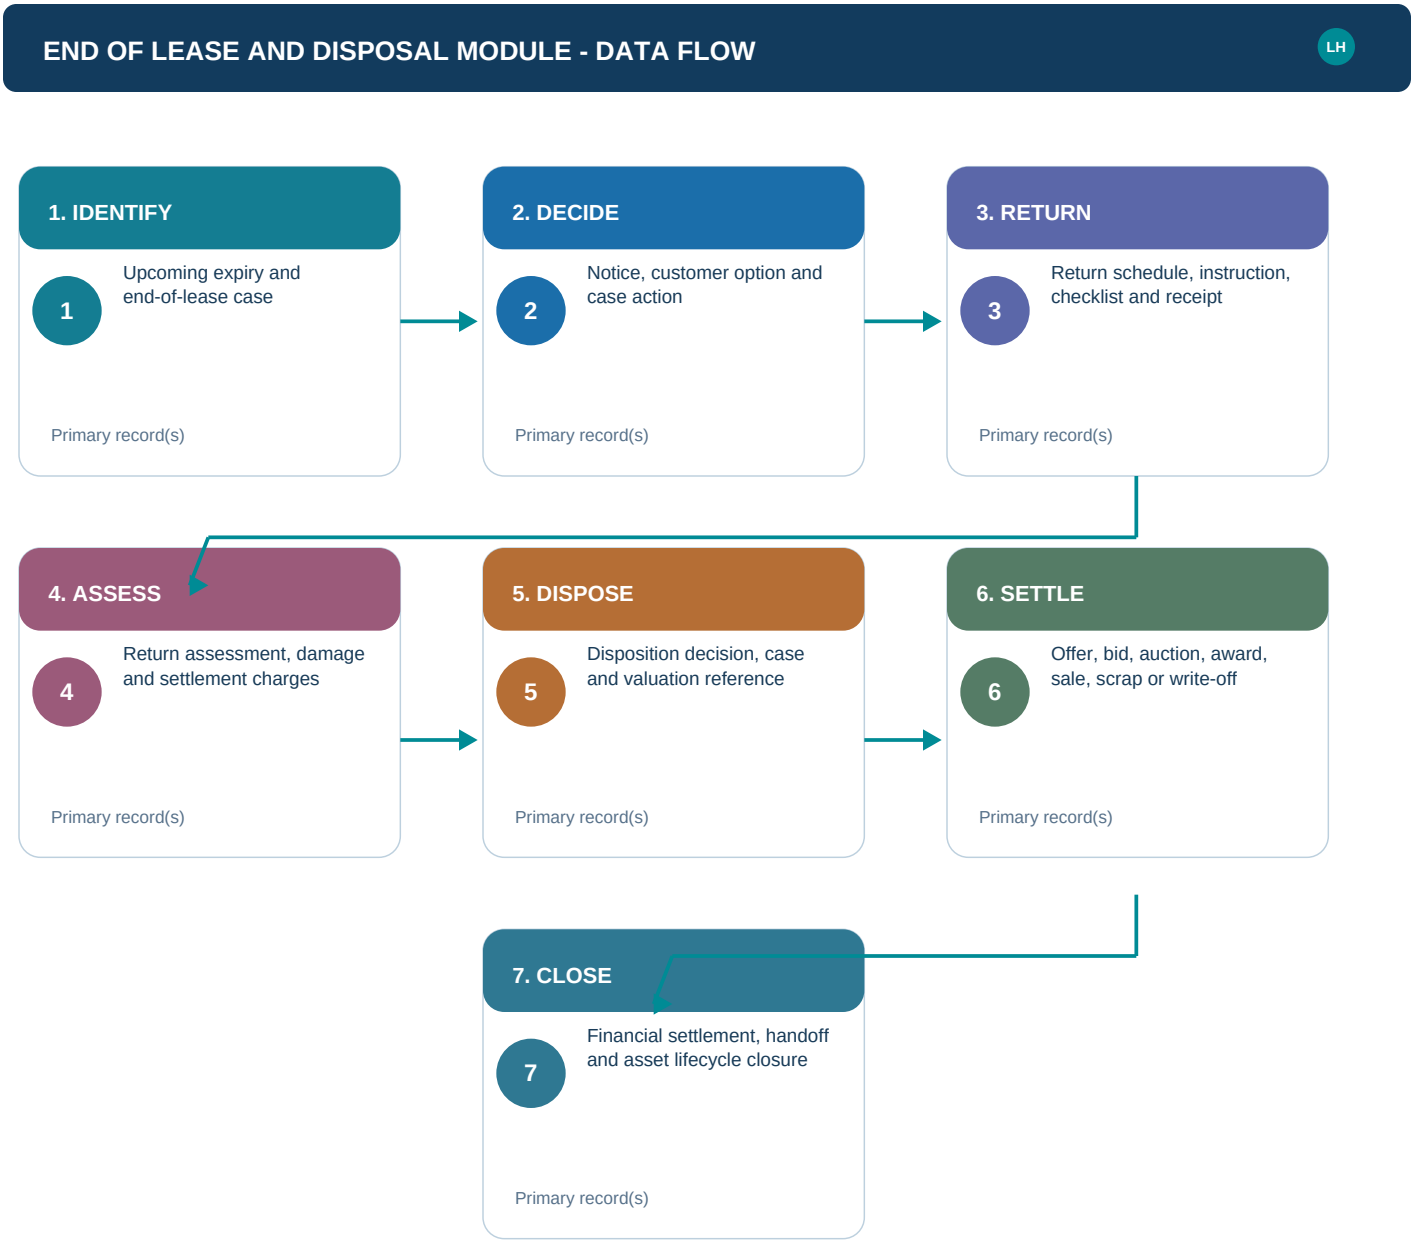
ENTITY MAP

End-of-lease case	The work record for expiring obligations and coordinated exit activity.
Notice / option	Records communication and the lessee or business exit decision.
Return / checklist	Plans custody transfer and records required return evidence.
Return assessment	Documents asset condition, usage, damage and chargeable variance.
Disposition / valuation	Selects the next path using an approved value reference.
Sale / scrap / write-off	Records the terminal commercial outcome and closure evidence.

The data-flow image on the next page is the quickest way to orient a new user before they work in the module.

End of Lease and Disposal Data Flow

The primary record flow, with its control points and downstream consumers.



DATA EXCHANGE AND CONTROL POINTS

- Each stage should carry a link to the prior controlled record rather than duplicating its key data.
- Approvals, accepted receipts, execution evidence or financial controls determine when the next stage may proceed.
- Status and history records make the current position, accountable user and audit trail visible across modules.

DATA-FLOW PHASES

Record Guide

What each stage records, and the decision or outcome it supports.

1

End-of-term identification

PRIMARY RECORDS

Upcoming expiry and end-of-lease case

OUTCOME

Starts controlled work early enough to meet contractual notice requirements.

2

Option and notice

PRIMARY RECORDS

Notice, end-of-lease option and case action

OUTCOME

Records the selected outcome and communication with the involved parties.

3

Asset return

PRIMARY RECORDS

Return schedule, instruction, checklist, supplier return and asset return

OUTCOME

Controls custody, route and expected evidence for returned assets.

4

Assessment and settlement

PRIMARY RECORDS

Return assessment, damage, excess usage and settlement charge

OUTCOME

Converts the returned condition into transparent contractual settlement information.

5

Disposition execution

PRIMARY RECORDS

Decision, disposal case, valuation, offer, bid, auction and award

OUTCOME

Creates a governed path to remarket, sell, refurbish, scrap or write off the asset.

6

Closure

PRIMARY RECORDS

Asset sale, scrap, write-off, refurbishment handoff and finance handoff

OUTCOME

Completes the final asset and financial lifecycle outcomes.

Use the stage status and linked records together when diagnosing a worklist or handoff issue.

PRACTICAL GUIDANCE

Working with the End of Lease and Disposal flow

Use these checks to keep records auditable, useful to downstream teams and ready for reporting.

THE OPERATING PRINCIPLE

Each workflow stage should create or update its own accountable record, retain the decision evidence, and link forward only when its control condition has been met.

CONTROL CHECKS

1. Open an end-of-lease case from reliable expiry and contract data, not from an ad hoc asset note.
2. Capture return condition and assessment evidence before calculating settlement charges.
3. Approve the disposition decision before sale, scrap, write-off or refurbishment activity begins.

DOWNSTREAM HANDOFFS

Lease Contracts supplies termination, return and contract obligations. Asset Management receives the final lifecycle status. Billing & Finance receives settlement, deposit and disposal financial outcomes.

WHEN A RECORD DOES NOT MOVE FORWARD

- Check the record status and the current owner or worklist.
- Open the linked predecessor record and confirm its approval, receipt, execution or posting condition.
- Review visible exceptions and history before changing data or creating a follow-up record.

This guide is a process reference. Follow your organisation's configured approval, policy and retention requirements.
