Lease Contracts Module Help

Contract definition, approval, execution, activation and servicing lifecycle

WHAT THIS GUIDE COVERS

Use this guide to track how an accepted commercial decision becomes an approved, executed and active lease contract, then changes through servicing, amendment and closure activity.

MODULE FLOW AT A GLANCE

Originate → Define → Approve → Execute → Activate → Service → Exit

HOW TO READ THIS GUIDE

Data flow image	Shows the controlled sequence and the records that move the work forward.
Entity map	Names the primary records and the role each record plays in the module.
Record guide	Explains the data each stage needs and the decision it makes possible.
Practical guidance	Highlights operational controls and the most important handoffs.

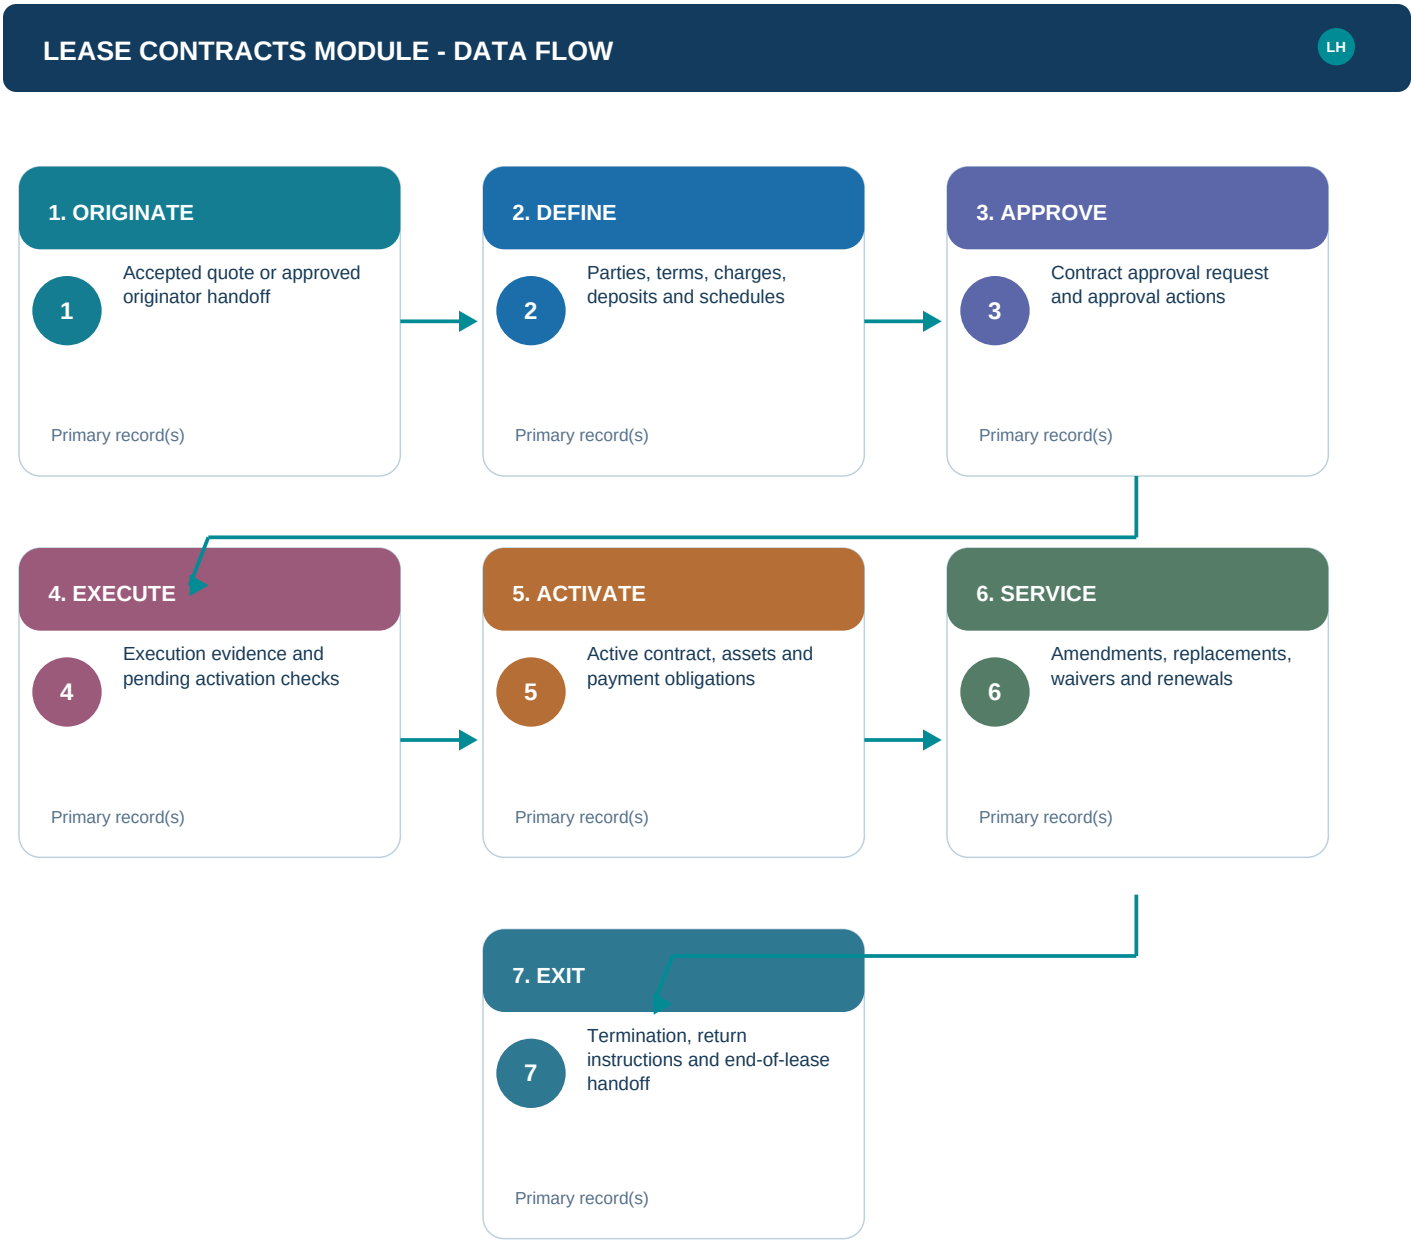
ENTITY MAP

Lease contract	The master agreement record and source of lifecycle status.
Parties / commercial terms	Defines customer, lessor, term, pricing, obligations and terms.
Charges / deposits / schedules	Creates the monetary commitments that feed billing and finance.
Approval / execution	Provides controlled authorization and signed-agreement evidence.
Contract assets	Links the leased assets, allocations, release and replacement history.
Amendment / termination	Records approved changes, renewals, waiver and exit decisions.

The data-flow image on the next page is the quickest way to orient a new user before they work in the module.

Lease Contracts Data Flow

The primary record flow, with its control points and downstream consumers.



DATA EXCHANGE AND CONTROL POINTS

- Each stage should carry a link to the prior controlled record rather than duplicating its key data.
- Approvals, accepted receipts, execution evidence or financial controls determine when the next stage may proceed.
- Status and history records make the current position, accountable user and audit trail visible across modules.

Figure 1. Lease Contracts Module Help data flow - read left to right, then continue on the lower row.

DATA-FLOW PHASES

Record Guide

What each stage records, and the decision or outcome it supports.

1 Origination

PRIMARY RECORDS

Accepted quote, opportunity or contract creation

OUTCOME

Starts a draft contract from an approved commercial basis.

2 Contract definition

PRIMARY RECORDS

Parties, commercial terms, charges, deposits and payment schedules

OUTCOME

Establishes the legal, commercial and financial obligations.

3 Governed approval

PRIMARY RECORDS

Contract approval request, queue and action history

OUTCOME

Secures the required authorization before execution.

4 Execution and activation

PRIMARY RECORDS

Execution record, activation checks and active contract

OUTCOME

Moves the signed agreement into an operating contract.

5 Contract servicing

PRIMARY RECORDS

Assets, replacements, amendments, waivers and renewals

OUTCOME

Keeps the active contract aligned with approved business changes.

6 Exit

PRIMARY RECORDS

Termination, return instruction, charges and end-of-lease handoff

OUTCOME

Coordinates contractual closure with asset return and settlement work.

Use the stage status and linked records together when diagnosing a worklist or handoff issue.

PRACTICAL GUIDANCE

Working with the Lease Contracts flow

Use these checks to keep records auditable, useful to downstream teams and ready for reporting.

THE OPERATING PRINCIPLE

Each workflow stage should create or update its own accountable record, retain the decision evidence, and link forward only when its control condition has been met.

CONTROL CHECKS

1. Keep a draft editable only until its configured approval or execution control takes effect.
2. Use amendment or revision records for approved post-activation changes instead of overwriting contractual history.
3. Activate only after required approval, execution and asset-availability checks are complete.

DOWNSTREAM HANDOFFS

Billing & Finance receives scheduled financial obligations. Asset Management receives allocations and releases. End-of-Lease & Disposal receives return, termination and end-of-term obligations.

WHEN A RECORD DOES NOT MOVE FORWARD

- Check the record status and the current owner or worklist.
- Open the linked predecessor record and confirm its approval, receipt, execution or posting condition.
- Review visible exceptions and history before changing data or creating a follow-up record.

This guide is a process reference. Follow your organisation's configured approval, policy and retention requirements.
