Procurement Module Help

Supplier, sourcing, purchase, receipt, matching and acquisition handoffs

WHAT THIS GUIDE COVERS

Use this guide to follow a purchase need from supplier setup through competitive sourcing, approved ordering, receipt and inspection, then into asset creation and finance matching.

MODULE FLOW AT A GLANCE

Qualify → Request → Source → Award → Order → Receive → Handoff

HOW TO READ THIS GUIDE

Data flow image	Shows the controlled sequence and the records that move the work forward.
Entity map	Names the primary records and the role each record plays in the module.
Record guide	Explains the data each stage needs and the decision it makes possible.
Practical guidance	Highlights operational controls and the most important handoffs.

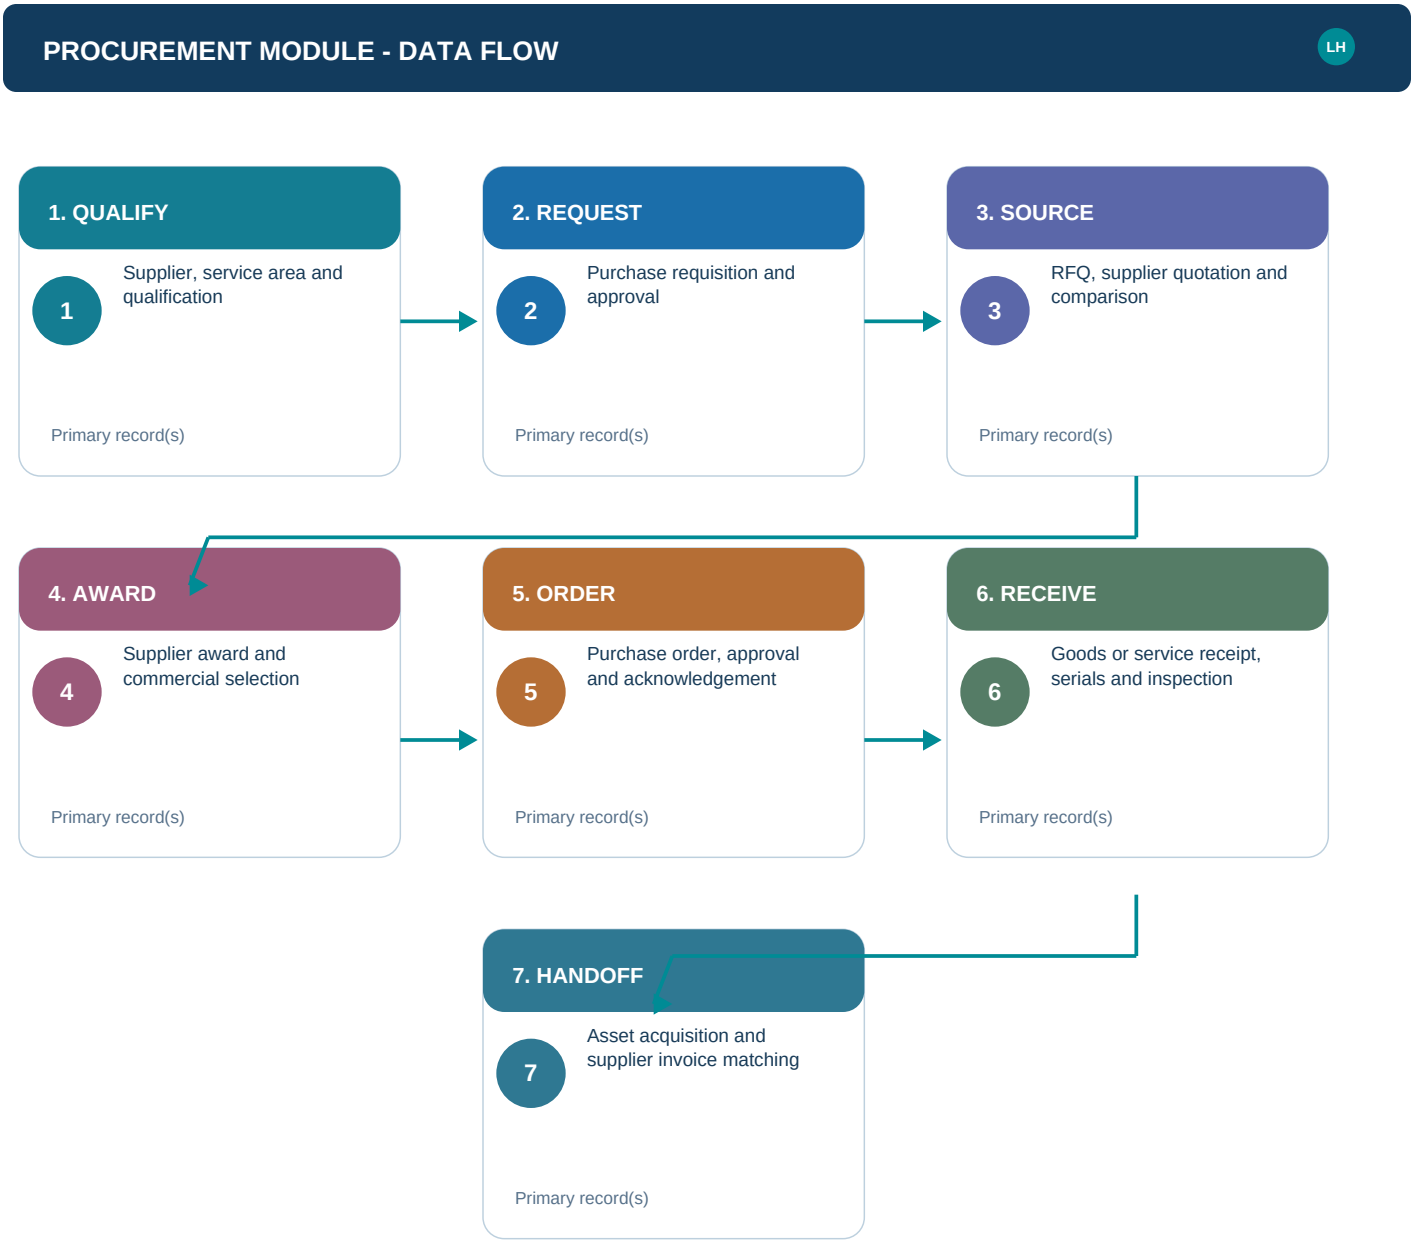
ENTITY MAP

Supplier	Maintains the counterparty, qualification and service-area context.
Purchase requisition	Captures the approved business need before sourcing or ordering.
RFQ / supplier quotation	Records an invitation, supplier responses and comparison evidence.
Supplier award	Selects the preferred supplier and commercial response.
Purchase order	Creates the approved commitment and supplier acknowledgement trail.
Receipt / inspection	Confirms delivery, serials, acceptance or rejected returns.

The data-flow image on the next page is the quickest way to orient a new user before they work in the module.

Procurement Data Flow

The primary record flow, with its control points and downstream consumers.



DATA EXCHANGE AND CONTROL POINTS

- Each stage should carry a link to the prior controlled record rather than duplicating its key data.
- Approvals, accepted receipts, execution evidence or financial controls determine when the next stage may proceed.
- Status and history records make the current position, accountable user and audit trail visible across modules.

DATA-FLOW PHASES

Record Guide

What each stage records, and the decision or outcome it supports.

1 Supplier readiness

PRIMARY RECORDS

Supplier, qualification and service area

OUTCOME

Ensures sourcing begins with an eligible supplier and delivery capability.

2 Demand control

PRIMARY RECORDS

Purchase requisition and approval action

OUTCOME

Documents the business need and approval before commercial commitment.

3 Competitive sourcing

PRIMARY RECORDS

RFQ, supplier quotation and quotation comparison

OUTCOME

Preserves quoted terms and a transparent selection rationale.

4 Commitment

PRIMARY RECORDS

Supplier award, purchase order, approval and acknowledgement

OUTCOME

Converts selection into an approved supplier order.

5 Receipt control

PRIMARY RECORDS

Goods receipt, service receipt, serial and inspection

OUTCOME

Confirms what was received and captures acceptance or return decisions.

6 Financial / asset handoff

PRIMARY RECORDS

Acquisition handoff, supplier invoice and invoice match

OUTCOME

Moves accepted supply into the asset register and accounts-payable workflow.

Use the stage status and linked records together when diagnosing a worklist or handoff issue.

PRACTICAL GUIDANCE

Working with the Procurement flow

Use these checks to keep records auditable, useful to downstream teams and ready for reporting.

THE OPERATING PRINCIPLE

Each workflow stage should create or update its own accountable record, retain the decision evidence, and link forward only when its control condition has been met.

CONTROL CHECKS

1. Do not bypass qualification or requisition approval when the policy requires them.
2. Keep RFQ responses and comparison evidence attached to the decision record.
3. Create asset-acquisition handoffs only from accepted receipts so asset identities match delivered goods.

DOWNSTREAM HANDOFFS

Asset Management receives accepted acquisition handoffs. Billing & Finance receives supplier invoice, matching and exception information for financial processing.

WHEN A RECORD DOES NOT MOVE FORWARD

- Check the record status and the current owner or worklist.
- Open the linked predecessor record and confirm its approval, receipt, execution or posting condition.
- Review visible exceptions and history before changing data or creating a follow-up record.

This guide is a process reference. Follow your organisation's configured approval, policy and retention requirements.
